Lucknow University

Organised By

N.A.S. COLLEGE STATISTICS ASSOCIATION

WHY STATISTICS

"Statistical thinking will one day be as necessary for efficient citizenship as the ability to read and write." This was said by Statistician Samuel Wilks in 1951 in his Presidential Address to the American Statistical Association. It means one has to be statistically literate so that one can think analytically, understand the context, and able to extract the right information from data. Statistics help you to understand and learn from the past, use the present properly, and make inferences about the future.

In an increasingly data-driven world where it is said: "Data is New Oil". Leaders use data to form governments. Corporate uses it to maximize profit. The government uses it to plan and formulate policies. Statistics and Data Analytics are the areas that are creating a lot of job opportunities with a good salary.

- Statistician
- Data Analyst
- Econometrician
- Business analyst
- Market Researcher
